About Me

IT professional with hands-on experience in enterprise IT operations, infrastructure monitoring, incident management, and service-level agreement (SLA) tracking through an internship at Virtusa. Experienced in using monitoring and IT service management tools, investigating alerts, coordinating operational activities, and supporting maintenance and alert suppression processes. Possess a strong technical foundation in IT operations, AWS, Linux, Docker, CI/CD, and infrastructure as code, complemented by full-stack development experience. Highly enthusiastic about IT operations and infrastructure, with strong analytical, communication, teamwork, and problem-solving skills, and a commitment to continuous learning and professional growth.

Professional Experience

Intern - Operation Center, *Virtusa | Wiley Managed Service* 05/2026 – Present
Sri Lanka

- Monitor application, server, and infrastructure alerts in an enterprise managed services environment.
- Work with monitoring and observability platforms, including Zabbix, Dynatrace, and Splunk, to review alerts and support incident identification and investigation.
- Support incident management activities through Jira Service Management (JSM), including ticket tracking, incident escalation, and monitoring SLA compliance.
- Identify and report potential SLA breaches and discrepancies in operational dashboards to support timely follow-up.
- Coordinate maintenance windows and alert suppression activities by reviewing change details, suppression requests, and scheduled time periods.
- Support daily operational reporting, shift handovers, incident updates, and change-related communications.
- Collaborate with infrastructure, application support, and incident management teams to coordinate operational activities and follow up on issues.
- Gain practical exposure to AWS infrastructure, Linux environments, server operations, and enterprise IT service management processes.

Education

Bachelor of Computer Science, *University of Ruhuna* 07/2023 – 09/2026
GPA: 3.63/4.0 Matara

Physical Science - A/Ls, *Rathnavali Balika Vidyalaya* Gampaha
1.4654 Z-score

Knowledge Area

IT Operations & Monitoring
- Infrastructure and Application Monitoring
- Alert Investigation and Incident Management
- SLA Monitoring and Incident Escalation
- Change Management and Maintenance Windows
- Alert Suppression and Operational Reporting
- Zabbix, Dynatrace, Splunk, Jira Service Management (JSM)

DevOps & Automation
- CI/CD Pipelines and GitHub Actions
- Terraform (Infrastructure as Code)
- Git and Version Control
- Python Scripting Fundamentals

Additional Technologies
- AWS Cloud Services
- JWT and BCrypt
- Tailwind CSS, Material UI, shadcn/ui

Cloud & Infrastructure
- AWS EC2, S3, RDS, IAM
- Linux and Windows Server Fundamentals
- Networking Fundamentals, DNS, TCP/IP
- Nginx and Web Server Fundamentals
- Docker and Containerization

Programming & Frameworks
- Java, Python, JavaScript, TypeScript, C
- Spring Boot, React.js
- REST APIs

Projects

Bridal Wear ERP Solution - Final project 11/2025 – 03/2026
- Developed a web-based ERP solution to digitise business operations, incorporating AI-driven Retrieval-Augmented Generation (RAG).
- Technologies: Spring Boot, React.js, TypeScript, PostgreSQL, Redis, Docker, GitHub Actions, Terraform, AWS EC2, S3, Nginx, Kafka, and OpenAI API.

Dine Ease - Group project, *Smart Canteen Management System* 07/2025 – 10/2025
- Developed a canteen management application using MVC architecture and design patterns to support ordering workflows and reduce queue times.
- Technologies: C#, .NET Framework, Guna UI2, and SQL Server hosted on AWS.

WorkMate360, *Employee Management Platform - Personal project* 04/2025 – 07/2025
- Developed and deployed a full-stack employee management application featuring JWT authentication, role-based access control, employee management, task management, and leave management.
- Technologies: Spring Boot, React.js, TypeScript, PostgreSQL, Supabase, AWS EC2, Nginx, Vercel, and HTTPS/SSL configuration.

Achievements

Winner – Road to Rush Coder 3.0 Hackathon, 01/01/2025
Dept. of Computer Science, University of Ruhuna

Participant – Road to InsurgEX 1.0 Hackathon, 01/11/2023
Dept. of Computer Science, University of Ruhuna
